

SD-WAN

Advantages from Cost to Control

- Typically, more cost-effective than other wide area network solutions
- Increases resiliency by consistently re-routing traffic to the strongest available connection
- Increased network control by prioritizing application and data traffic. For example, social media would have a lower priority than a VoIP phone call. These rules are set by your systems administrator and can be quickly easily changed.
- Change rules and monitor your network from anywhere.

SD-WAN (Software Defined Wide Area Network)

Does your business have multiple locations, remote sites, or branch offices? Is managing connectivity and data sharing becoming more of a task than you bargained for? Are you spending a small fortune on equipment and people to manage it? Is uptime of utmost importance? If you answered yes to any of these questions, SD-WAN may be the solution you are looking for.

SD-WAN relies on software to direct and manage your network traffic. Capable of routing traffic over nearly any commercially available data service, while using a centralized control center to manage security and traffic flow, SD-WAN simplifies network control while decreasing cost.

Benefits of SD-WAN

- Flexibility – Utilize any data connection available at a given location
- Reduced Cost – eliminates the need for redundant security/control devices at each location
- Growth – Easily deploy and manage new remote locations
- Lower Overhead – Less time and money spent on managing your network
- Streamlined Management – Manage your network from anywhere with a single interface
- Security – Route all your traffic through a single security appliance
- Bandwidth – More efficiently manage bandwidth usage throughout your organization
- Agility – Rapidly respond to changing bandwidth, security, and data flow requirements

ABOUT STRATUS NETWORKS

Stratus Networks, Inc. is a leading national provider of data, voice and Internet services to all sizes of businesses and government agencies. Offering unparalleled support and an extensive selection of innovative solutions, Stratus Networks has grown to become a premier carrier in the telecommunications marketplace. For more information about solutions, service or pricing please contact your Stratus Networks representative directly.
