# FLEX

## FLEX CLOUD

**Stratus FLEX** provides adaptability, cost transparency, scalability, ease of use and top-notch security allowing you to move your servers to the cloud. Gone are the days of having a “data closet” in every office or workspace.

### STRATUS FLEX USES 3 MAIN COMPONENTS TO ACCOMPLISH THIS:

- **FLEXCompute:** Virtual servers in the cloud replaces your on-site servers
- **FLEXStorage:** Virtual storage in the cloud replaces your on-site data storage and backup devices
- **FLEXlinQ:** A high-speed, private and reliable transport to access your virtual data and app storage

Built from the ground up with full integration of everything needed to deploy and manage cloud data centers, Stratus Network's FLEX Cloud provides enterprise-grade infrastructure services, allowing its platform to be utilized by SMBs and enterprise-sized customers with features like:

- Fully Integrated Complete Stack
- Securely Nested Multi-Tenancy
- Data Center Automation
- High Performance Elastic Storage
- Unlimited on-demand Scalability

Our fully integrated Cloud Software Solution was designed with simplicity and ease in mind allowing us to build, deploy and manage your cloud data centers and services quickly and efficiently.

### FLEX ADVANTAGES

- High-speed private transport
- Low latency
- Cost effective
- Geo-redundant datacenters
- Fixed billing
- Elastic resources
- User controlled
- Enhanced security
- Bring your own VM images
- SPLA Windows licensing
- Flexibility and reliability
- Web-based management

Since 1999, companies of all sizes and varying telecom needs have engaged Stratus Networks for internet, data, cloud and voice solutions that deliver speed, reliability and security backed by our team's expertise and support.

**We deliver faster, more reliable internet and communication services with a businesses-only fiber optic network built from the ground up.**
